1. Introduction

A Data Mart is designed to answer questions and provide information requirements in a user-friendly manner, based on users' needs. Data Mart has been developed for NCI to give end-users access to IMPAC II and Enterprise data and, therefore, gives users the capability to perform powerful analysis, query, and reporting without affecting the mission-critical operating systems. This particular area of Data Mart makes Historical data, to the extent that it is obtainable from IMPAC II, (which goes as far back as 1994-1995) available for reporting purposes.

This flexible and easy-to-use system is developing in increments, of which this is the first. This first increment provides support for Program Management Analysis of extramural grants data in the following areas:

- Funding
- Program Coding
- Principal Investigator
- Program Director
- Cancer Activity
- Institution
- Summary Statements
- Abstracts
- Strategic Plans and Mason Goals
- EZ Accrual

This first increment of Data Mart retrieves source data from the following systems: IMPAC II, NCI Enterprise, EZ Accrual, a *CTEP Shadow System*, and AEGIS. Data Mart provides the current view of the data, and every day, whenever a change is made to data information in IMPAC II or NCI Enterprise, the old information is updated.

Data Mart can be accessed through a variety of tools (i.e., Crystal Reports, SQL +, SQL Navigator, and TOAD). However, for ad hoc reporting purposes, Oracle Discoverer has been proven to be the most efficient tool in accessing Data Mart. NCI supports and administers the Discoverer End User Layer.

In order to access Data Mart most efficiently, it is recommended that the user work from the Discoverer Desktop Edition, which is provided by Core Services.

Figure 1. Data Mart log-in

At the log-in prompt, the user will enter the same username and password that is used in order to access programs in NOW, and will also enter “rdmp” in the “Connect” field (as shown in Figure 1).

Once logged in, the user will be able to access information in the following business areas that are supported in the End User Layer of Discoverer:

- Grant Information
- Grant Reference Detailed Information
- NCI Organization and PD Information
- Institution and Geographic Information
- Advanced PI and PI Profile Information
- Protocol Information
- Abstracts and Summary Statements
- Date Time Analysis Information

There is a mandatory condition on all data called “Current and Accepted RDM Records.” The records are updated every day, and all data is valid, having gone through all business rules checks and validations. Therefore, the records are not historical.

We would like to note that this is a work in progress. Though the whole document is subject to change and revision, the **highlighted** sections are being specifically researched and updated.

2. Grant Information Business Area

The Grant Information Business Area within the "RDMDISCO" end user layer (EUL) is shown in Figure 2. **Insert Description of the Business area**

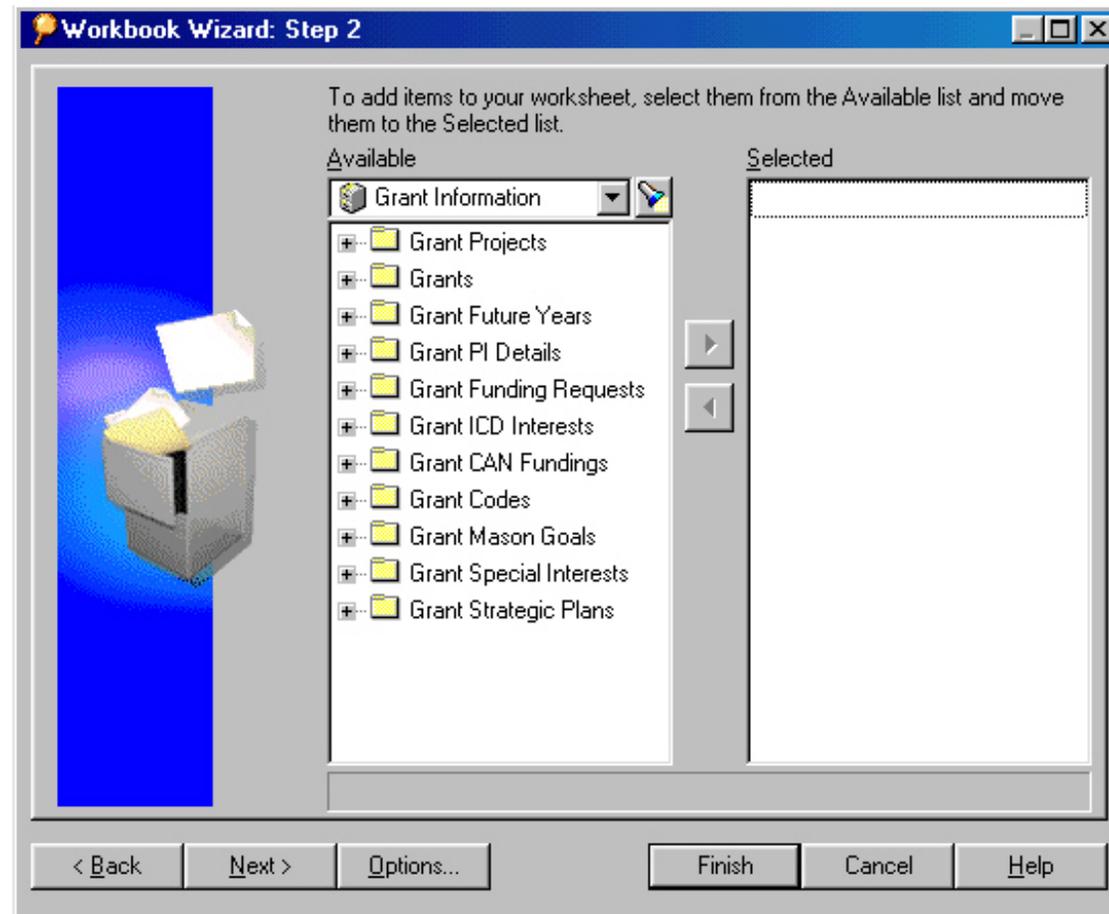

Figure 2. The Grant Information Business Area (as seen in Oracle Discoverer)

Grant Projects Folder

A list of grant projects that logically groups grants for reporting purposes. A project record exists for each competitive application in the NCI Enterprise. A project is defined using the ICD and Serial Number of the grant (referred to as the grant key). Data elements are listed in Table 1.

Table 1. Business Area: **Grant Information...**Folder: **Grant Projects**

Data Element Name	Default Prompt	Format Mask	Data Type	LOV	Source	Description
Original Project Id	Orig Proj Id		Varchar	Yes	RD.PROJECTS_VW.ORIGINAL_PROJECT_ID	The original ICD and serial number for the project
Project Starting FY	FY	9999	Number		RD.PROJECTS_VW.PROJECT_STARTING_FY	The Fiscal Year in which the project is scheduled to begin
Project Id	Proj Id		Varchar		RD.PROJECTS_VW.PROJECT_ID	The current ICD and serial number for the project
Project Title	Title		Varchar		RD.PROJECTS_VW.PROJECT_TITLE	The current title of the project
Project Start Date	Proj St	MM/DD/YYYY	Date		RD.PROJECTS_VW.PROJECT_START_DATE	The start date of the project
Project End Date	Proj End	MM/DD/YYYY	Date		RD.PROJECTS_VW.PROJECT_END_DATE	The end date of the project

Grant Folder

The NCI interested grants as maintained by IMPAC II including all of the major grant-related information (PD, PI, Institution, CA, IRG, statuses, budget data and more). Currently, the NCI Reporting Data Mart does not contain pre-appls... Data elements are listed in Table 2.
